AI, DATA, AND THE WORK THAT MATTERS

Put intelligence to work.

Turn AI ambition into better work that leaders can trust.

We help enterprises decide where AI matters, build the systems it needs, and change how people work.

Direction Decide what matters	Make a consequential AI, data, or workflow decision with a clear rationale, owner, and next step.
Studio Build what is needed	Design, build, and integrate the AI, data, and software systems behind a business outcome.
Tenfold Change how work gets done	One connected experience: Academy develops people, Flow installs work, and Pulse helps leaders act on evidence.

Founded in 2018, Siametrics connects business judgment, data science and engineering. Our experience spans enterprise and public-interest work.

Service-assisted today. Academy programmes are available. Repeatable Flow, Pulse and integrated engagements are being validated through bounded use.

SELECTED EXPERIENCE

A small team. Work with real consequences.

Founded in 2018, Siametrics connects business judgment, data science and engineering. Our experience spans enterprise and public-interest work.

Retail banking performance

Nationwide data engineering connected 1,000+ inputs for branch planning and sales performance. The bank uses and extends the foundation itself.

SET, TAT and corporate banking

A shared AI foundation for SET, a knowledge service for TAT, and a banking strategy that led to a credit-report drafting system.

Research in public view

Road-safety research with iTIC, geographic analysis with PIER and digital-assets policy papers through Thailand Future.

Organizations in our story

Selected organizations from our client and collaboration history.

Krungthai Bank	Arise by INFINITAS
INFINITAS by Krungthai	The Stock Exchange of Thailand
Bangkok Bank	THE STANDARD
The Secret Sauce	Betagro

These relationships span different engagements and years.
